

NEW PRODUCT RELEASE (2006-13)

Holley 750 CFM Mech Sec Street HP

AVAILABLE: CURRENTLY

PRODUCT DESCRIPTION ▼

Holley is proud to announce the availability of their 750 CFM Mechanical Secondary Street HP carburetor, P/N 0-82751. The Street HP uses the best features from the race bred 750 CFM 4150 HP carb, but tamed for street use.

The Street HP features the contoured main body from the 4150 HP and adds a tumble polishing for a shiny finish. The metering system includes a timed spark port and is calibrated for a hot street/strip engine setup for outstanding throttle response and driveability. A street HP base plate is used so there are plenty of vacuum ports for power brakes, PCV, etc.

Other features include mechanical secondaries for optimum street use, fourth generation power valve design, power valve blow-out protection, non-stick gaskets, adjustable air bleeds, two corner idle system, Ford kick-down and down-leg boosters.

KEY FEATURES AND BENEFITS ▼

- Tumble polished shiny finish for great looks
- Contoured venturii for increased airflow and more power – No choke provisions
- All necessary vacuum ports for easy street vehicle installation
- Street/Strip calibration for outstanding throttle response and street drivability
- 2-corner idle circuits
- Mechanical Secondaries
- Ford kickdown linkage
