

NEW PRODUCT RELEASE (2007-13)

Holley 650 CFM Mechanical Secondary Street HP

AVAILABLE ► JULY

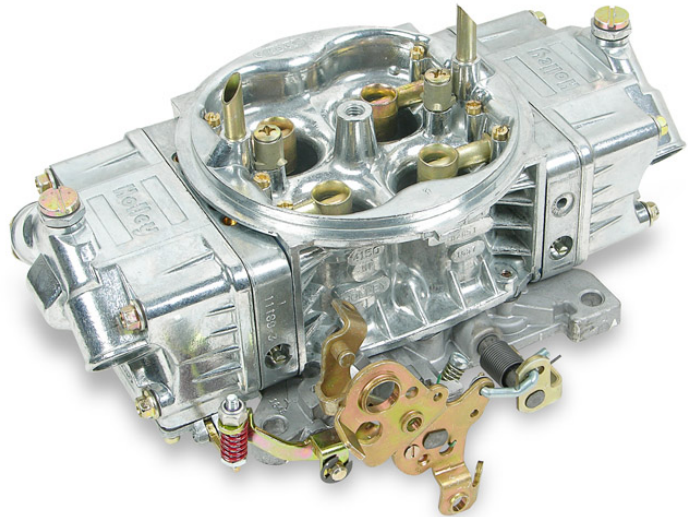

PRODUCT DESCRIPTION ▼

Holley is proud to announce the availability of their 650 CFM Mechanical Secondary Street HP carburetor, P/N 0-82651. The Street HP uses the best features from the race bred 650 CFM 4150 HP carb, but tamed for street use.

The Street HP features the contoured main body from the 4150 HP with a tumble polished shiny finish. The metering system includes a timed spark port for a vacuum advance distributor and is calibrated for a hot street/strip engine setup for outstanding throttle response and drivability. A street HP base plate is used so there are plenty of vacuum ports for power brakes, PCV, etc.

Other features include mechanical secondaries for optimum street use, power valve blow-out protection, non-stick gaskets, adjustable air bleeds, four corner idle system, Ford kick-down and straight-leg boosters.

The Street HP line features all of this at a budget-minded pricing level!

KEY FEATURES AND BENEFITS ▼

- Tumble polished shiny finish for great looks
- Contoured venturii for increased airflow and more power – No choke provisions
- All necessary vacuum ports for easy street vehicle installation
- Street/Strip calibration for outstanding throttle response and drivability
- 4-corner idle circuits for precise idle control
- Mechanical secondaries (Double Pumper®) for serious off-idle acceleration
- Straight leg boosters for a strong vacuum signal and great throttle response
- Ford A/T kickdown linkage
- Budget minded pricing!

END USER SEGMENTS ▼

- Hot street vehicles
- Bracket racers/drag racers
- Oval track racers
