

## Holley 850 and 950 CFM Street HPs

AVAILABLE: NOW

### PRODUCT DESCRIPTION

Holley is proud to announce the availability of two new Street HP series carburetors in 850 and 950 CFM. The already popular Street HP series uses the best features from the race bred 4150 HP carb, but are tamed for street/race use and priced for budget-minded enthusiasts.

The Street HP series features the contoured main body from the 4150 HP with a tumble polished shiny finish. The metering system includes a timed spark port for vacuum advance distributors and is calibrated for outstanding throttle response and drivability on hot street/race engines. A street HP base plate is used so there are plenty of vacuum ports for power brakes, PCV, etc.

Other features include mechanical secondaries for optimum tire-turning performance, power valve blow-out protection, non-stick gaskets, adjustable air bleeds, four corner idle system, Ford kick-down and down-leg boosters.

### KEY FEATURES AND BENEFITS

- Contoured venturii for increased airflow and more power – No choke provisions
- All necessary vacuum ports for easy street vehicle installation
- Street/Strip calibration for outstanding throttle response and street drivability
- 4-corner idle circuits
- Mechanical Secondaries
- Ford kickdown linkage
- Tumble polished shiny finish for great looks
