0-86770BL	770 CFM "Ultra" Street Avenger (BLUE)
0-86770BK	770 CFM "Ultra" Street Avenger (BLACK)

These carbs feature all aluminium construction including metering blocks and a base plate made from 6061-T6 billet aluminium. Three different anodized color options (Red, Blue, or Black) allow for a personalized look while maintaining the ultra high strength and durability you get from billet. Weighing in at approximately 5 lbs less than a comparable zinc carburetor will not only save weight under the hood, but will also save on shipping costs.

The new Ultra Street Avenger carburetors, in addition to the above, have the same great features that made their zinc counterparts so popular. Features like a tumble polished finish; quick change vacuum secondaries for easy tuning to optimize performance or fuel economy; four vacuum ports for all necessary vacuum accessories; factory preset "No trouble" electric choke for easy start ups; built-in fuel filters; and an included fuel line kit so there are no unnecessary trips back to the parts store. Ultra Street Avengers also feature the same optimized street calibration as the zinc versions so you know they will run great out-of-the-box. In addition, the Ultra Street Avenger now comes with a built-in, clear fuel level sight glass for easy, no mess fuel level adjustments. The aluminum construction also provides a durable, long lasting shine.

Feature	Benefit
Aluminium Construction	Saves Weight on top of the Engine
Billet Metering Blocks & Baseplates	Ultra-High Strength & Durability
Available with Red, Blue, or Black Anodized Billet Parts	Ultra-Cool Modernized Looks
Optimised Street Calibration	Better Drivability and Performance
